LOW-N-SLOW BBQ SMOKING

SMOKE RING
prized layer of pink just below the bark

this "low-n-slow" method, featuring indirect heat and wood smoke, provides intense, bold flavors to our barbeque

considered a delicacy - these bite-size morsels of smoked brisket are flavorful, crispy, fatty bark bits.

they are one of our house specialties and around here we affectionately call them

NO...It's not burnt! bark is that amazing, jerky like crust that forms on the outside of smoked meat and is the result of a perfect combination of smoke, seasoning, and low and slow heat

ALSO BURNT ENDS BARK
